ABSTRACT

This 2001 report is an institutional profile for LaGuardia Community College of the City University of New York. The report includes the following sections: (1) a student body profile; (2) enrollment profile; (3) measures of success (degree and graduation statistics); (4) adult and continuing education; and (5) institutional resources (information technology, faculty and staff, library, finances, grant awards, and space). Highlights from the student profiles category include the following: (1) the ethnic background of students at LaGuardia in the fall term of the year 2000 was 34% Hispanic, 16% Black/Non-Hispanic, 16% Asian or Pacific Islander, 14% White/Non-Hispanic, 0.2% Native American, 5% other, and 16% unknown; (2) 14% of year 2000 entering students planned to earn an associate's degree or certificate, while 86% had plans to obtain a bachelor's, master's, or higher degree; (3) 92% of first-time, degree-seeking students in the year 2000 needed preparatory work in at least 1 subject area; (4) 74% of entering students needed to take basic math; (5) the average 5-year rate for associate's degree attainment at LaGuardia was 25.7% (compared with the national average of 18.6%); (6) approximately 65% of academic year 1999-2000 graduates reported continuing their education in senior colleges within 6 months of graduation; and (7) the year 2000 employment rates of LaGuardia graduates averaged 51% over the past 5 graduating classes. A glossary of specialized terms used in report is appended. (NB)

September 2001

The Office of Institutional Research is pleased to present the 2001 Institutional Profile. We hope the information it contains will be useful to all those who are interested in LaGuardia Community College. With this in mind, the Profile has been developed as an information resource for as broad a spectrum of people as possible. Among others, this includes the college's faculty, staff, and administrators, present and potential students, alumni, public representatives, and the local community. In order to satisfy a wide range of needs, we have provided statistical descriptions of a variety of college aspects. The Profile's principal subject, however, continues to be the characteristics, enrollment patterns, and performance outcomes of LaGuardia students.

Information about academic program offerings, administrative offices, and institutional affiliations and accreditations can be found in the front of the report for handy reference. Throughout the sections of tables and charts, five-year trends are shown wherever possible, along with brief analytical remarks. A glossary is provided at the back with the definitions of any specialized terms that were used in the presentation of the data.

We welcome comments on this issue, as well as suggestions about how future issues may serve your interests more meaningfully.

Barbara Astone, Ph.D. Director

Acknowledgments

Once again, many people at LaGuardia collaborated to produce this issue of the Institutional Profile. Qi-Jian Gau, research analyst, not only coordinated the project but also compiled and formatted most of the data presented, with the competent assistance of Mei-Chan Chen, Devendra Rawal and Rosemary Lujan.

Several people from departments throughout the college contributed in various and substantial ways, whether by providing data or text, submitting parts of their own reports, proofreading copy, or cooperating to help us meet important deadlines. In particular, we wish to thank the following individuals for contributing once again this year. Steve Brauch for the information on Adult & Continuing Education; Judith Chiti and Elise Johmann for grants information; Dean Richard Elliott for figures concerning college revenues and expenditures; Louise Fluk for data referring to the Library; William Pan and Kamlesh Bulsara for reporting Space information; Jeffrey Weintraub for data concerning graduates; and Diane Colon, Ted Dec, Theresia Litvay-Sardou, and Jairo Vanegas for data on information technology. Susan Landaira kindly proofread the final draft. We also wish to thank Bill Freeland, who designed the cover, and Peter Wang for his photographs of LaGuardia Community College students. The contributions and cooperation of all are gratefully acknowledged.

world, and many have arrived in New York relatively recently. In fact, in the 2000 entering class, nearly half the foreign-born population had immigrated to the U.S. less than five years before (New Student Survey, Fall 2000). Among the 11,780 students in credit-bearing programs, there were 97 different languages spoken natively. Nearly all LaGuardia students make their homes in New York City now. More than two-thirds live in Queens County.

Age Fall 1996 to Fall 2000

In addition to the ethnic and linguistic diversity of LaGuardia students, there is also a wide range of ages. The trend in recent years has been toward younger students. Yet, while about 45 percent of students were traditional college age (between 17 and 22), and about five percent were younger, more than a quarter were well into their twenties, and another 23 percent were over 30. The median age in Fall 2000 was 23.

RP

Sex Fall 1996 to Fall 2000

The distribution of males and females at LaGuardia is still heavily female, but in the past five years there has been a slight but steady increase in the number of men. Among the different ethnic groups, the proportions of women and men vary somewhat. The Asian population is close to equal in sex distribution.

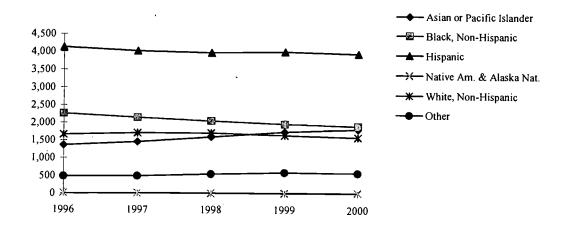

Fall	Female	%	Male	%	Total
1996	7,315	66.0%	3,765	34.0%	11,080
1997	7,138	65.3%	3,787	34.7%	10,925
1998	7,128	64.5%	3,930	35.5%	11,058
1999	7,236	63.5%	4,160	36.5%	11,396
2000	7,440	63.2%	4,340	36.8%	11,780

Sex by Ethnic Background, Fall 2000

Ethnic Origin	À.	Female	Male
Asian or Pacific Islande	r	52%	48%
Black, Non-Hispanic		67%	33%
Hispanic		66%	34%
Native Am. & Alaskan I	Nat.	66%	34%
White, Non-Hispanic		66%	34%
Other		56%	44%
Total		 63%	37%

Ethnic Background Fall 1996 to Fall 2000

The distribution of students comprising the major racial and ethnic groups is showing some changes, in that the number of Asian students has increased steadily for the past five years while the number of Black students has decreased. The largest ethnic group continues to be Hispanics, who comprise a little more than one-third of the student body. Since 1996 Asian or Pacific Islanders have increased about 34 percent, while Black, Non-Hispanics have decreased about 15 percent. The number of students who choose not to indicate a racial or ethnic group has also increased over the years, which may be a signal that the existing categories are inadequate, or in some other way unsatisfactory.

Educational Goals

Degree-Seeking Students Fall 2000

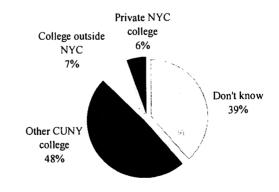

Degree Goal	Percent
Certificate	1%
Associate	14%
Baccalaureate	37%
Master's or higher	48%

LaGuardia students have high educational goals. Only 14 percent of 2000 entering students planned an Associate's degree or a Certificate, while 86 percent had hopes for higher degrees. Many students indicate that they expect to transfer early: Only 67 percent had clear expectations of staying at LaGuardia until they graduate. Forty-eight percent of the students with higher degree goals said they expected to stay in the CUNY system, but 39 percent had no clear transfer plans.

Source: LaGuardia Community College Data Warehouse

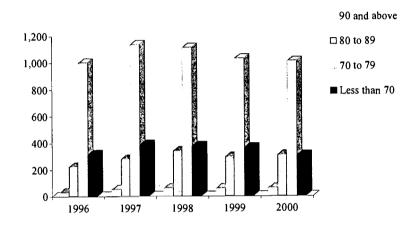

Seventy-one percent of the 2000 entering class were first-time students while twenty-nine percent transferred from other colleges, the highest transfer number in five years. Although most students in the 2000 entering class were recent high school graduates, this group has been decreasing in size; it is 5 points smaller now than it was five years ago. In addition to the increase in transfer students, the number of students entering with GEDs was also higher in Fall 2000.

High School Averages

First Time Students, Fall 1996 to Fall 2000

Of students entering from high school, considerably more are entering with higher grades. Five years ago only 16 percent had grades of 80 or above, but in 2000 that portion rose to 22 percent. Correspondingly fewer students entered with merely average and belowaverage grades.

Basic Skills Needs Fall 1996 to Fall 2000

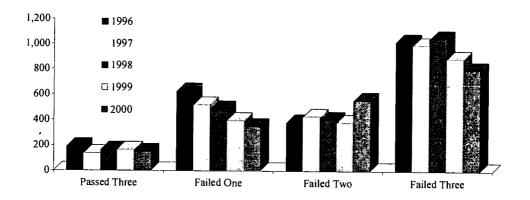

Students requiring basic skills courses in reading and math decreased between 1999 and 2000. But of students needing writing, many more were placed into ESL as compared to basic writing courses. Of all the basic skills areas, students were most likely to need math. In 2000, fully seventy-four percent of entering students needed basic math, although this was five percentage points fewer than in the previous year.

					Basic				Students
Fall	ESL	%	Reading	%	Writing	%	Math	%	Tested
1996	534	24%	1,273	58%	804	36%	1,805	82%	2,212

Basic Skills Test Performance

Fall 1996 to Fall 2000

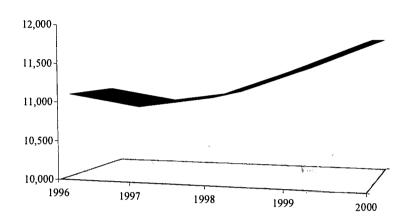

Ninety-two percent of first-time, degree-seeking students in 2000 needed preparatory courses in at least one subject area. The number of students needing work in all three areas has decreased substantially, however, to the lowest point in five years. In 2000, more students failed two tests than at any time since 1996. The proportion of students failing one or more tests continues to fluctuate, largely due to modifications in the testing protocol and changes in the passing standards.

	Passed		Failed		Failed		Failed	· · · · · · · · · · · · · · · · · · ·	Row

11,080	10,925	11,058	11,396	11,780

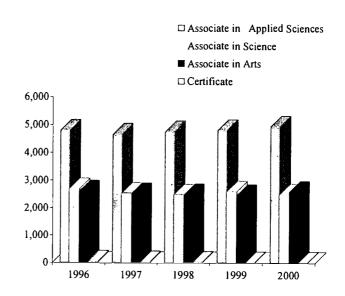

Source: LaGuardia Community College Data Warehouse

Enrollment at LaGuardia has been on the rise since 1997. In 2000 it reached its highest point ever, 11,780 students. Even after a brief dip in 1997, the student body in 2000 was 700 students larger than it was five years earlier, an increase of 6.3 percent overall.

All Students by Degree Type Fall 1996 to Fall 2000

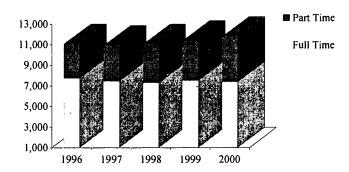

Most students at LaGuardia enroll in occupational degree programs, which accounted for 49 percent of 2000 enrollments. Associate in Science and Associate in Arts programs made up 25 percent and 26 percent of enrollments, respectively. The increase in non-degree enrollments continues, however, with fully 15 percent of the student body now taking courses outside any degree program. Much of this increase has occurred among new students (see p. 21).

All Students by Full Time and Part Time Status Fall 1996 to Fall 2000

There has been a steady increase since 1996 in the number of students having part time schedules. In 2000, part time students jumped three percentage points, to 37 percent of the student body.

Fall	Full Time	%	Part Time	%	Total
1996	7,760	70%	3,320	30%	11,080
1997	7,456	68%	3,469	32%	10,925

						1996	1997	1998	1999	2000

The portion of students who attend evening classes has fluctuated only slightly since 1996. Only about 22 percent of students in 2000 enrolled in evening classes, slightly more than in 1999. It is interesting to note that daytime schedules are also preferred by non-matriculating students. As shown in the table below, among nondegree students, 85 percent attended classes during the day in 2000. This is partly explained by the fact that much of the non-degree population is made up of high school students in programs such as College Now! and College Connection.

Non-Degree Students by Day and Extended Day Fall 1996 to Fall 2000

3,550	3,573	3,565	3,713	4,057

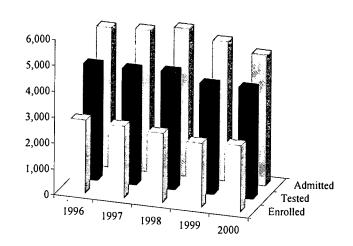

Source: LaGuardia Community College Data Warehouse

New student enrollment has increased sharply in the past two years, rising nearly 14 points since 1998. In Fall 2000, the size of the entering class increased by 344 students, or 9.3 percent over the previous year. Much of this increase is represented by high school students, such as those in the College Now! program, taking college courses at LaGuardia.

08

Admitted vs. Tested vs. Enrolled Degree-Seeking Students Fall 1996 to Fall 2000

All students who are admitted to LaGuardia are required to take tests in basic reading, writing, and math. Not all students who are admitted, or tested, however, necessarily go on to enroll. Over the past five years, the number of students who were admitted and have gone on to be tested has fluctuated, but in Fall 2000 it increased six percentage points from the previous year. The difference between the number who were tested and those who enrolled also increased, if less sharply, to 61 percent from 59 percent a year earlier.

			% of Admits				
Fall	Admitted	Tested	Tested	Enrolled	Enrolled		
1996	5,395	4,447	82%	2,849	64%		
1997	5,474	4,448	81%	2,795	63%		
1998	5,707	4,534	79%	2,699	60%		
1999	5,400	4,235	78%	2,496	59%		
2000	5,070	4,268	84%	2,588	61%		

New Students by Degree Type Five Year Trend

Associate in Applied Sciences (A.A.S.) programs are still the most popular among new students at LaGuardia. Although previously there had been a decline in those programs in favor of more transfer-oriented majors, in 1997 a relatively sharp drop occurred in A.S. enrollments. A.A.S. majors comprised 47 percent of enrollments in 2000.

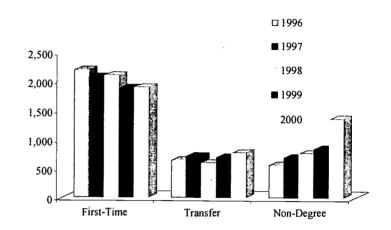

Degree	19	1996		1997		1998		99	2000

New Students

by First Time, Transfer, and Non-Degree Status Fall 1996 to Fall 2000

About 70 percent of new students at LaGuardia who enter degree programs have not been to college before; the remainder transfer from other colleges. As shown in the table below, however, more and more students are opting for non-degree status. In 2000, the number of new students with non-degree status increased to 34 percent overall.

Measures of Success

Degrees Awarded Five Year Trend

In 1999-00, LaGuardia's graduating class decreased in size for the first time in five years, dropping 126 students from the previous year.

Graduating Class	Graduates
1995-96	1,413
1996-97	1,414
1997-98	1,443
1998-99	1,472
1999-00	1,346

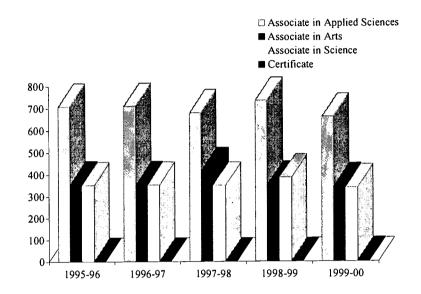

Measures of Success

Degrees Awarded by Degree Type Five Year Trend

The distribution of degree types in the graduating class is about the same as that in the student body. On average over the past five years, only one percent more A.A.S. degrees have been awarded as compared to enrollments in those programs. For both A.A. and A.S. degrees, the proportion of degrees has been equal to enrollments, on average (see page 13).

e 39

Degrees Awarded by Ethnic Origin Five Year Trend

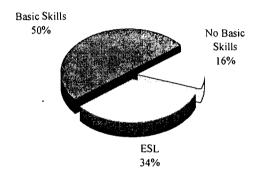

The ethnic and racial composition of the graduating class at LaGuardia has been generally comparable to that of the student body as a whole in most years. Before 1998-99, however, Hispanic students comprised a smaller part of the graduating class than of the student body (see page 5). In 1999-00, a considerably larger percentage of Black, non-Hispanic students were in the graduating class, as compared to their enrollment in 1999 and in 2000.

Ethnic	199	5-96	199	6-97	199	7-98	199	8-99	1999	9-00

Degrees Awarded by Entering Basic Skills Status 1999-00 Graduates Who Began in ESL, Basic Skills, or College-Level Courses

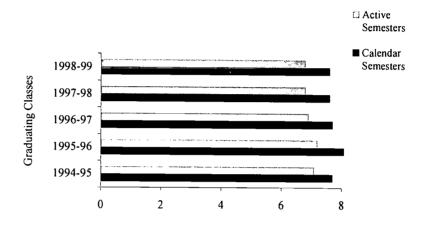

The majority of graduates in the past five years took basic skills or English as a Second Language courses when they began their studies at LaGuardia. In 1999-00, 84 percent of graduates had begun in basic courses.

Time to Degree Five Year Trend 1995-96 to 1999-00

LaGuardia graduates average about seven and three-quarters semesters, under four years, to obtain their degrees. However, about a semester of that time is inactive -- that is, students are not taking classes. For the past five graduating classes, the average number of semesters students had spent actively earning credits was 6.96, or just about three and a half years.

Destinations of Graduates Who Transfer

Most LaGuardia graduates who continue their education remain within the City University of New York (CUNY) system (82 percent). Baruch, Hunter, and Queens colleges are the most popular choices by far, with over 50 percent of all transfers selecting those neighboring institutions.

Employment and Transfer of Graduates

Five Year Trend

A large number of 1999-00 graduates, about 65 percent, report having continued their education in senior colleges within six months of graduation. Of these, about 85 percent enrolled in colleges within The City University system. Almost three-quarters (72 percent) said they had planned for senior college since they first entered LaGuardia. Another 13 percent decided after enrolling, and 15 percent realized after graduation that they wanted additional education.

The employment rates of LaGuardia graduates, up slightly in 2000, averaged 51 percent over past five graduating classes. Many graduates are both working and attending senior college (only eight percent report doing neither). Average salaries have increased steadily in the past five-year period and were up sharply in 2000. Starting salaries for LaGuardia graduates averaged \$29,211, sixteen percent more than in 1995.

Post-Graduation Activities

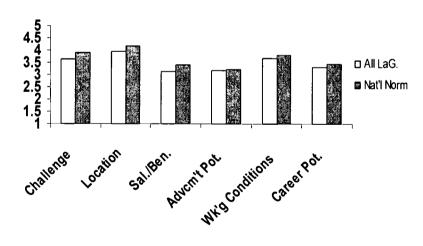

At One and Two Years After Graduation

Surveyed at one and two years after graduation, fully eighty-eight percent of graduates said they were either working or going to college. The largest number, forty percent, indicated they were doing both. Only 7 percent said they were unemployed.

On a scale of 1 to 5, with 5 being Very Satisfied, graduates' satisfaction with their post-graduation employment averaged 3.49, or just between "Neutral" and "Satisfied." While this score is somewhat lower than the national norm, which averages 3.66, it is comparable.

Graduates said they were most satisfied with the location, the challenge, and the working conditions of their post-graduation employment. Salary and benefits and advancement potential scored lowest.

National Ranking of Minority Graduates

For several consecutive years, LaGuardia Community College has ranked among the top community colleges in the country in graduating minority students. In 1999-00, LaGuardia was No. 4 nationally. That year, three of the top ten colleges in the national ranking were City University of New York (CUNY) colleges.

New Yorkers' Views on Higher Education

"New Yorkers believe that higher education is vitally important for success in the contemporary world.... [They] have high expectations for what they think students should take away from a college education... [They] believe the main responsibility for success rests with the student, but also expect institutions to help those who help themselves. Paying for college is difficult, but doable."

Guardia Community College/CUNY

The Division of Adult and Continuing Education continues to serve people of all ages through different programs. This Fall, those between the ages of 15 and 19 represented just under seventeen percent of those who gave us their birthdate, a significant increase over 1999's nine percent. The age group 20 - 24 also grew significantly, to almost seventeen percent from 9 percent the year before.

ACE Enrollment

by Ethnic Origin Fall Terms, 1996 - 2000

Ethnicity	1996	1997	1998	1999	³ 2000

Institutional Resources Information Technology

Distribution and Use of Information Technology 1999-00

The college's network infrastructure is built upon a fiber optic Gigabit Ethernet backbone that supports numerous servers, with switched 10/100 Ethernet connections provided to the desktop. The backbone connects all college buildings with singlemode and multimode fiber optic cables. In 1998-1999 all full time faculty were equipped with personal computers with Internet capability. In 2001, all full time faculty computers were upgraded again. This three -year replacement cycle enables LaGuardia's faculty members to be on the edge of computer technology. In 2001, LaGuardia Community College deployed Interactive Voice Response system and Interactive Web Response system that enables our students to register via phone or Web. We offer each full time student an Email account. All student labs managed by Information Technology are connected to the college's network via Fast Ethernet running in full duplex mode.

Also in 1999-00, student email was extended to all full time students through 26 Internet-capable computer laboratories, which house 909 computers. At present, one computer is available for every 14 students at LaGuardia.

As the inclusion of computer technology in the curriculum increases, student labs are put to ever more continuous use. Over 2000 classes are conducted in computer labs annually, and over 1500 open lab hours per week were available to students.

Available since 1999, the CUNYnet Media Distribution Systme provides access to dedicated and dial-up connectivity. The

system combines the power of video conferencing, document sharing and realtime computing, which enable two-way interactive video communication among multiple sites. With transmission speed capabilities from 56 KBS to 1.544 MBS and a clear, precise and timely delivery of multimedia programs in instructional setting, the system will provide many new learning and teaching opportunities to faculty, staff, and students. Also, a new Media Distribution and Media Streaming laboratory will soon be open where faculty, staff and students will have access to state of the art equipment. Continuous faculty and staff development are also provided throughout the academic year in the use of the most popular software programs and the Internet.

During the 1999-00 academic year, the college switched from a mainframe-based system for managing student admissions and registration to the Student Information Management System (SIMS) shared by its sister colleges within the university.

Complementing the operational systems related to SIMS is the LaGuardia Community College Data Warehouse, a historical data base that facilitates information retrieval for executive decision making, archival record keeping, and research. A repository of historical data pertaining to students, faculty, and staff since 1986, the Data Warehouse consists of approximately 50 tables that contain a full range of academic history, admissions, census, and personnel information.

Institutional Resources Faculty & Staff

Employee Profile

In Fall 2000, 1,161 people were employed at LaGuardia Community College. About 626, or 54 percent, were employed full time. Faculty, the largest single employee category, make up about 39 percent of all full time employees. Administrative staff, the second largest grouping, comprise 27 percent. Other job categories include clerical and classified staff. who make up 24 percent, technical and paraprofessionals, eight percent, and senior administrators, two percent.

The balance between women and men in the workforce is tipped somewhat toward women at LaGuardia, who make up about 56 percent of employees overall, but this varies to some extent according to job category. Among clerical and classified staff, where jobs are traditionally held by women, the ratio is larger than two to one in favor of women. Yet also among the technical and paraprofessional staff, where jobs are frequently held by men, women predominate. In all other categories, however, the percent of men and women is close to equal.

Most people in the full

time workforce fall between the ages of 36 and 55. Age within job category, however, varies. The clerical and classified staff is somewhat younger on average than the faculty are, for example, 75 percent of faculty are between 46 and 65 years old. Within seven years, in fact, about twenty percent of faculty and senior administrators will be eligible for retirement.

There is significant racial and ethnic diversity in the workforce at LaGuardia, although its distribution does not parallel that of the student body. Among the faculty, who have the most direct relationship with students, the racial and ethnic distribution is six percent Asian, 21 percent Black, 9 percent Hispanic, and 64 percent White.

Employment at LaGuardia is relatively stable. A large segment of full time employees, about 37 percent, have worked at the college for more than 15 years. Among faculty and senior administrators this is true for about 53 percent. While turnover is highest among the clerical and classified staff and technicians and araprofessionals, about half of the former and two thirds

61

of the latter have been at LaGuardia for more than five vears.

The proportion of tenured faculty in the ranks is high, at about 74 percent, which corresponds to most faculty members' long length of service.

Professional employees at LaGuardia are highly credentialed. Nearly half the faculty - about 45 percent -have doctorates, an unusually large proportion in the community college sector. The professional staff are also highly educated. Including both the administrative and technical categories, 41 percent have master's degrees and 2 percent have doctorates.

Cumulative Gross Square Footage of College Buildings Occupied by Five Year Intervals

Cumulative Gross Square Footage of College Buildings Occupied by Five Year Intervals

Source: Campus Facilities Office/Division of Administration

A ribbon-cutting ceremony in June 1999 celebrated the expansion of the physical plant at LaGuardia to include the acquisition of a new building and parking facilities. The new parking facilities include a two-story parking garage and two open parking lots.

Total square footage in 2001 is 1,741,400 (see page 59, Table 1).

Approximately 462,000 sq. ft. tenants occupied or unused space is awaiting renovation for future use.

Term	Definition
Administrative Staff	Includes employment titles in the following series: Higher Education Officer, College Laboratory Technician, Managerial, Research, and Registrar.
Admits	Persons admitted to CUNY and allocated to LaGuardia, and persons admitted directly to LaGuardia, irrespective of whether or not they actually enrolled for classes.
Age	Age is calculated as of the date Fall semester data were captured for the year indicated.
Clerical and Classified Staff	Includes employment titles in the following categories: Clerical group, Custodial, CUNY Office Assistant/Associate, Mail, Motor Vehicle, Print Shop, Purchasing Agent, Special Officer, Stores, Stock.
Curriculum Code	Code number assigned at LaGuardia to identify programs of study culminating in degrees or certificates.
Day Student	A designation selected by students upon admission to the college. Day student status requires completion of Cooperative Education program requirements.
Degree-Seeking Student	Matriculant. Refers to all students enrolled in curriculums that culminate in A.A., A.S., A.A.S. degrees or Certificates. Includes transfer students.
Extended Day Student	A designation selected by students upon admission to the college. Extended Day status does not require completion of Cooperative Education program requirements.
Faculty	Includes teaching titles of Professor, Associate Professor, Assistant Professor, Instructor, Lecturer, and Visiting Faculty. (Adjunct faculty titles are included where part-time employment is reported.)
First Time Student	Student enrolled in a degree program who has not previously earned credit toward a degree from any college or university (i.e., excludes transfer students).
First Year Student	Students having 0 to 27.5 cumulative credits earned.
FTE	Full Time Equivalent. A mathematical equation used primarily for budgeting purposes. The total number of credit hours or equated credit hours for which full time and part time students are enrolled is divided by the standard number of full time hours per academic year (30).

Term	Definition
Full Time Employee	Defined in terms of hours worked, as designated by job title: Faculty, 27 contact hours; Counselor and Librarian, 30 contact hours; Custodial and Security, 40 hours per week; all other staff, 35 hours per week.
Full Time Student	Student enrolled for 12 or more credits or the equivalent number of hours in the semester indicated, and students certified as full time by the Registrar.
GED	General Equivalency Diploma, equivalent to the high school diploma.
HEGIS Code	Code number assigned to registered academic programs by the New York State Education Department.
Non-Degree Student	Non-matriculating student enrolled in credit-bearing courses but not in a degree program in the semester indicated.
Part Time Employee	Job titles included within the categories of Teaching Adjunct; Non-teaching Adjunct; College Assistant.
Part Time Student	Student enrolled for fewer than 12 credits or hours in the semester indicated.
Second Year Student	Students having 28 or more cumulative credits earned as of the semester indicated.
Senior Administrator	Includes employment titles: President, Vice President, Dean, Associate Dean.
Technical and Para- Professional staff	Includes employment titles within Electronic Data Processor (Programmer Analyst, Technical Support Aide, Computer Aide), Accountant, Engineer, Manager, and Staff Nurse.
Transfer Student	Students awarded college credit earned elsewhere prior to enrolling as a new student in the semester indicated.
Workforce	Full time employees in all job titles.
